Ruled paper pdf downloads microsoft powerpoint download

For print projects, use the EPS files to ensure that icons print clearly at any size. The expanded palette colors are also available in swatches within the template, but do not use these against Wolfpack Red. When used this way, the icons should appear at the bottom of the email signature, below all the other elements, including the NC State brick. Search results from the campus directory will also be added at a later date. If you already have an email signature, verify that the information is correct. For certain entities operating under unique circumstances, the utility bar might not be required. Use our set of on-brand icons to add visual interest and illustrate important facts and figures within your web and print content. Click Save Changes at the bottom of the page. The utility bar is responsive.
