All animals have a circle of life. This life sciences work has your students colouring the cycle of life. As they color, they will learn that the first stage is eggs. Next, the eggs turn into nymph. Finally, adults are formed. Children will enjoy coloring at different levels as they learn this first grade science concept. □Testori in a set (18)□Add for the collection□Syeign digitalCommon Core State StandardsTexas Essential Knowledge and Skills (TEXT)Virginia Standards of Learning (SOL)BC Performance StandardsAlberta Australian Medical Curriculum Study Programme (EVENT)Victoria Curriculum (F-10)No standards related to this content To continue enjoying our website, we ask that you verify your identity as a human being.
